Perfect your listening enjoyment. The rich strokes of a double bass, the wrath full rumble of a storm and the crack of thunder – often it's not until you use a subwoofer that these become a true sonic experience. Getting those long low-frequency sound waves oscillating optimally calls for targeted development of speaker diaphragms, cabinets, electronics and, of

course, their optimum interaction. Subwoofers take the strain off your other speakers, enabling them to concentrate fully on the high to low-midrange. Active subwoofers offer additional support via an integrated end stage.
